# REJUVENATE MATURE FIELDS

---

## 2X GREATER PRODUCTION BY TRANSITIONING ARTIFICIAL-LIFT METHODS

Mexico

---

## 11% PRODUCTION INCREASE AFTER INSTALLING FORESITE® PLATFORM ACROSS 3,000 WELLS

United Arab Emirates

---

## 3,500 MORE BARRELS PER DAY AFTER RESTORING PRODUCTIVITY WITH WELL SERVICES

North Sea

---

As a single-source provider, we help our customers to boost productivity with techniques that quickly generate cash flow and systematically accelerate the performance of aging wells.

### INCREASE LIFT EFFICIENCY

- Optimize production with integrated technologies
- Adopt the most appropriate form of lift and transition systems without a rig

### RESTORE WELLBORE INTEGRITY

- Diagnose common production problems
- Repair downhole issues without a rig and often without well shut-in

### ACCELERATE RESERVOIR RECOVERY

- Analyze flow and isolate problematic zones
- Produce new reserves near the wellbore or initiate infill drilling

### ABANDON THE FIELD PERMANENTLY

- Reduce well abandonment costs
- Establish impenetrable well integrity and preserve the environment
