

WELL CONSTRUCTION & COMPLETIONS

MINIMA™ RESOLVE COMPOSITE FRAC PLUG

Powerful Reservoir Isolation for
High-Pressure Stimulation and Fast Drillout

Weatherford®

LIGHTWEIGHT CONFIDENCE, EASY CLEANOUT

Start production sooner with the efficient plug that holds strong and mills out fast.

To reach production quickly and efficiently, stimulation operators require multizone, plug-and-perf completions with minimal downtime. Minima™ Resolve composite frac plugs meet this challenge with reliably strong zonal holds and superfast millouts—leaving a clean wellbore that is ready for production. Compared to standard frac plugs, Minima Resolve creates 40% less cuttings when flushed to surface and features multiple designs with top- and bottom-setting configurations with either traditional shear-screws or a composite shear-ring that safely separates below the plug.

Ceramic buttons for quick millout

Composite slips for reliable anchoring

Beveled bottom for easy deployment

HOLDS PRESSURES
**UP TO
10,000 psi**

TOLERATES TEMPERATURES
**UP TO
250°F**

MILLS OUT IN AS LITTLE AS
5 MINUTES

COMPACT SIZE LEAVES
**40% LESS
MATERIAL**

LIGHTWEIGHT CUTTINGS
**SIMPLIFY
REMOVAL**

HOLD STRONG, MILLOUT FAST

Increase the speed and efficiency of multizone completions with the composite plug that minimizes millout so you can reach production sooner. Learn more how Minima Resolve can add value to your stimulation operations today.
