

Want fewer surprises?

# Your Standard for Exceptional Performance

**The Modus managed pressure wells solution enhances operational performance with simple, precise pressure management while capturing data in a digital platform.**

The solution creates a comprehensive pressure management strategy that precisely and continually manages the primary well-control barrier, eliminating pressure spikes, manipulating effective mud weights, increasing rates of penetration (ROP), improving hole stability, and optimizing drilling plans.

## Why choose Weatherford?

---

### We understand your challenges

After thousands of jobs, and millions of operating hours, we have earned a deep knowledge of downhole conditions and how to use managed pressure drilling (MPD) technologies and techniques to mitigate and avoid performance limiting events.

### We stand by our technology

Industry-leading technology displays wellbore condition data digitally for quicker reaction to downhole events including kicks and losses.

### We are your single source for well integrity

We provide a portfolio of innovative solutions and the technical support that help you protect people and the environment while you streamline your operations and maximize productivity.

# MODUS

MANAGED PRESSURE WELLS SOLUTION

VISIT THE WEBSITE

A comprehensive pressure management strategy mitigates risks and improves performance to deliver high-quality wells with fewer surprises.

By providing visibility and control of downhole conditions, the Modus solution displays, captures, and transfers data in real time, enabling safe drilling in narrow, shifting, and unknown drilling windows by managing equivalent circulating density (ECD). This trusted approach, backed by decades of expertise, improves operational safety and preserves formation integrity to streamline your operations and maximize well productivity.

Real Results:  
Utica Shale

**9 days**

ahead of 15 day plan

**60%**

well delivery improvement

**18%**

ROP increase

**18,000 ft.**

lateral drilled in a single trip
