

# NEW ENERGY SOLUTIONS

**Innovative. Sustainable. Accessible.**

Securing the future of energy for today and tomorrow

With world-class engineering of leading quality, we deliver economically sustainable solutions that optimize and decarbonize operations. By relentlessly advancing innovation through diverse thinking and expert collaborations, we provide cutting-edge technologies and advanced digitalization solutions that you can rely on to secure the future of energy and a cleaner planet. Enabling a cleaner energy future.

- We relentlessly develop through innovation
- Diverse thinking and expert collaboration underpin our every action
- The result is reliable, proven technologies and advanced digitalization

## GEOHERMAL ENERGY

**Sustainable. Efficient. Everywhere.**  
Technologies that take the heat

## CARBON CAPTURE AND STORAGE

**Permanent. Reliable. Controlled.**  
Permanent carbon storage

## PLUG AND ABANDONMENT

**Safe. Secure. Efficient.**  
Finish responsibly

## Harnessing clean power for a **carbon-neutral planet**

We believe that a better world starts now. As a global leader in energy services, we consider it our responsibility to help our customers produce in more sustainable ways, whilst supporting energy security.

- Collaborate with our customers to drive decarbonization efforts
- Innovatively shape the path forward in the energy transition
- Deliver safe and reliable solutions for every well phase

## Building long-term partnerships, designed to meet your unique challenges and **enable sustainable operations**

It's easy to be passionate about sustainability, but it's a collective effort that pushes us closer towards a carbon-neutral future. That's why building long-term partnerships is at the heart of our sustainability offering.

- Collaborate towards a carbon-neutral future
- Over 40 years experience in developing new energy solutions
- Global and local availability to see through long-term projects

## Securing the future of energy with **innovation and digitalization**

Continuous innovation keeps the industry moving forward. As energy innovators, we believe problem-solving is in our DNA.

- Deliver advanced digitalization and technology through diverse thinking and regional expertise
- Scalable world-class innovative solutions, in any operational environment
- Resilient spirit to solve your unique challenges
- Safe, streamlined operations delivering maximum value
