CHALLENGE ACCEPTED

Maximize offshore returns.

From shallow to deep water, Weatherford delivers offshore solutions that provide new ways to reduce costs and improve performance for greater profitability.

OFFSHORE SOLUTIONS

While focused on cost, recovery, and risk, we integrate our technologies into one seamless solution. Below we mention just some of our offshore capabilities to achieve success, from well construction to production.

6 DAYS SAVED PER WELL, 37 DAYS SAVED OVER DRILLING CAMPAIGN USING MPD

Gulf of Mexico

30% FASTER TUBULAR RUNNING, ZERO REJECTED JOINTS USING VERO® SYSTEM

United Arab Emirates

UP TO 60% LESS INSTALLATION TIME WITH TR1P™ COMPLETION SYSTEM

West Africa

REDUCE OPERATIONAL COSTS
WITH LESS RIG TIME AND MORE EFFICIENCIES

— Increase penetration rates with state-of-the-art tools and deployment methods
— Automate casing makeup, and reduce running time
— Install completions in a single trip, and remotely function downhole valves using ROVs
— Plan lift systems strategically, and manage assets proactively
— Accelerate interventions with integrated abandonment services under one roof

INCREASE RESERVOIR RECOVERY
WITH PROACTIVE AND AUTONOMOUS OPTIMIZATION

— Adjust well targets in real time, and avoid formation damage during drilling
— Enable cased-hole functionality in the open hole to access more reservoir
— Instrument, actively analyze, and remotely manage the reservoir
— Optimize artificial lift, surface facilities, and the asset as one
— Use riserless solutions in problematic wells, and sidetrack wells when needed with ease

MANAGE RISK EXPOSURE
FOR JOB SAFETY AND WELL INTEGRITY

— Manage downhole pressures safely, and oversee multiple drilling rigs remotely
— Assure connection and well integrity while decreasing red-zone personnel
— Reduce onboard personnel using multiskilled crews from completing the well on paper (CWOP) to production
— Limit travel to the wellsite with autonomous lift adjustments and instant alerts
— Intervene with crosstrained crews and remote guidance, and abandon with trusted barriers
