

HD Interface Panel

Adds support for HD tools to the Scientific Data Systems STIP panel

Applications

- Enables HD tools to be operated on the SDS STIP when fitted with HD surface Modem Board

Features and Benefits

- USB device, no modifications required to STIP except HD Modem Card
- Provides 300V DC tool power

Tool Description

The Weatherford HD interface panel is a USB device that adds support for HD tools to the Scientific Data Systems STIP.

It is a rugged, reliable, and self-contained unit which provides 300V DC tool power in addition to handling all communications between the downhole tools and the surface and from the internal modem to the STIP.

The HD interface panel is recommended when there is need to work in different units or for portable operations.

Specifications

Dimensions

Length	19.0 in. (482.6 mm)
Width	19.0 in. (482.6 mm)
Height	2.0 in. (50.8 mm)
Weight	18.0 lb (8.17 kg)

Electrical specifications

Voltage (output)	300V DC
Voltage (input)	110V AC / 240V AC
